BOXES

We stock an extensive range of boxes including single wall, double wall and stationery boxes suitable for letterheads, compliment slips and business cards. This economical range is ideal for protecting goods in transit, supplied flat-packed for easy storage.

When measuring a box, the dimensions are given in the following order:-
*length x breadth x height* (all measurements are internal)

Single Wall
Single Wall corrugated cardboard consists of one fluted medium between two sheets of linerboard.

Double Wall
Double Wall has two fluted mediums sandwiched between three sheets of linerboard.

BOX STYLES

Fefco box styles

Fefco box styles are what we use to describe what type of box you might need. We use the industry standard codes for different box styles, for example, the most popular box style is 0201 which is a type of box you are fairly used to seeing - it has two outer flaps that meet in the middle top and bottom to tape.
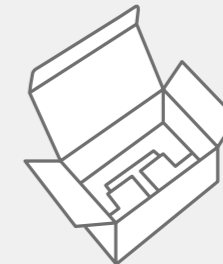

Fefco style 0201
Regular lap end case
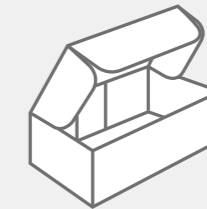

Fefco style 0426
Corner cut folder - ideal for ecommerce
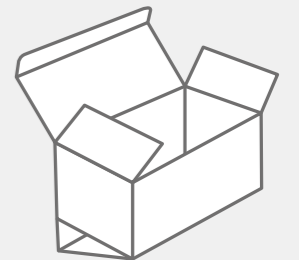

**Fefco style 0211**
Tuck in top and bottom

Fefco style 0421
Folding box with locking sides

Fefco style 0215
Tuck in top - ideal for ecommerce

Fefco style 0203
Regular lap end case fully overlapping flaps

SINGLE WALL BOXES

Made from a single layer of corrugated fluting, single wall boxes are perfect for packing, storing and shipping light to medium weight objects. These boxes are supplied flat packed and in multiple pack sizes, which makes shipping and storage more convenient. Made from a high percentage of recycled material, our single wall boxes are very environmentally friendly and can be fully recycled after use.

DOUBLE WALL BOXES

Made from two strong layers of corrugated fluting, double wall boxes are perfect for packing, storing and shipping medium to heavy weight objects. The extra strength provided by these boxes also makes them perfect for shipping fragile goods and means they can be used for longer term storage requirements. These boxes are supplied flat packed and in multiple pack sizes, which makes shipping and storage more convenient. Made from a high percentage of recycled material, our double wall boxes are very environmentally friendly and can be fully recycled after use, whatsmore the extra strength provided by these boxes makes them perfect for multiple use. Multi depth boxes are designed with multiple height options available, simply cut down to the required height, fold and secure - further improving the versatility of the boxes but also ensuring that the boxes fit perfectly to the contents being packed.

LOOKING FOR SAFETY CUTTERS & KNIVES

CONTACT US

AFTER YOU'VE MADE YOUR CHOICE OF BOX, DON'T FORGET YOU MAY NEED THE FOLLOWING:

+ *Tape to secure your delivery, available in a range of sizes, thicknesses and adhesive types - page 11*

+ *Tape dispenser guns - large range available to speed things up, please contact us.*

+ *Document enclosed wallets to secure delivery notes - page 28*

We stock a wide variety of adhesive tapes including many different types of adhesive suitable for a range of packaging requirements.

We also offer personalised tapes that can be printed with your logo or company name, which is an ideal way to get marketing messages across quickly and creatively at minimum cost.

When it comes to sending parcels and packages it's important to ensure products are securely sealed in their packaging. Our range of tapes offers everything anyone needs to make sure goods are well protected at every stage of their journey.

We provide a range of sealing tapes manufactured from a variety of materials and available in different strengths and sizes.

Our handy tape guide can help:

SELF ADHESIVE TAPES COMPARISON

TYPE	STRETCH	NOISY	TEARABLE	FIBRE TEARING BOND	QUALITY RATING 1-5 HIGH - LOW
Vinyl	No	No	Yes	Yes/High	1 Very good
PP Solvent	Yes	Yes	No	Yes/High	1-2 Very good
PP Hot Melt	Yes	Yes	No	Yes/Medium	2 Good
PP Low Noise	Yes	No	No	Yes/Medium	2-3 Good
PP Acrylic	Yes	Yes/No	No	No/Low	4-5

USEFUL INFORMATION
TAPES

There are two main types of packaging tape with various adhesives available to suit your application:

+ *Vinyl*
  Also known as PVC, vinyl tape is thicker than PP and has a smooth and quiet release from the roll. It's easily torn by hand, but doesn't stretch, and is strong enough to take puncture holes. Matt in appearance, this carrier type is only available with a solvent adhesive.

+ *Polypropylene (PP)*
  PP tapes are shiny in appearance and come in a range of adhesives (Solvent, Hotmelt, Acrylic) to cover all packaging applications. They are more cost effective and environmentally friendly compared to vinyl, but are less likely to hold a puncture.

ADHESIVES

+ *Solvent – is a natural rubber recommended for sealing medium to heavy loads and is temperature resistant. It's available in standard and low noise as well as for manual or machine applications.*

+ *Hotmelt – is known as a synthetic rubber suitable for general applications. It's one of the most popular adhesives and is available for manual or machine application.*

+ *Acrylic – is a water based adhesive available in standard and low noise. It's not recommended for use in cold conditions as it can lift. Acrylic adhesive works best for sticking polythene.*

MASTER'IN TAPES

Our range of Master'in tapes offer a great quality of product at competitive prices, especially when compared with other branded packaging tapes in the market. Our range of tapes include vinyl, polypropylene and paper masking tapes. Whatever the application, we offer a variety of tapes to help ensure goods are securely sealed for every stage of their journey.

POLYPROPYLENE TAPE

Polypropylene (PP) tapes are quickly becoming the packaging tape of choice because of the variety of applications that the tape can be used for and the economical cost to purchase. Polypropylene film carrier is very versatile and can be used for hotmelt, solvent and acrylic adhesives. Polypropylene is seen as an environmentally friendly product as it is made using waste products from the petroleum industry.

ITEM CODE	ADHESIVE TYPE	COLOUR	WIDTH (mm)	LENGTH (M)	MICRON	BOX QTY

620466	BOPP Acrylic	Buff	48	66	25	36
622314	Acrylic	Clear	48	66	25	36
625776	Hotmelt	Clear	48	66	25	36

POLYPROPYLENE LOW NOISE TAPE

Low noise tapes, using a polypropylene carrier, are available with either a solvent or acrylic adhesive. Packaging tapes can be surprisingly noisy to pull off a roll, which can be important when being used in busy packing areas. Solvent based acrylic tapes have good operating temperature ranges and acrylic adhesive is very cost effective.

VINYL TAPE

Vinyl or PVC tape is seen as a premium carrier film for packaging tapes because it can be stronger, smoother and easier to pull off a roll, will not stretch and can also be torn by hand. The only adhesive available on Vinyl tape is solvent, which also means that these tapes are quieter in use and not affected by extremes of temperature.

MASKING TAPE

Masking tapes are paper based, pressure sensistive, tapes that can be used for multiple tasks such as D.I.Y. masking and craft. Masking tapes have low adhesion which makes them easy and clean to remove but also offer good resistance to solvents and liquids, which makes them great for decorating and for outdoor use.

WATER ACTIVATED TAPE

NEW PRODUCT

Water activated tapes have an adhesive which is activated by water and creates a highly resilient bond with the fibres of the corrugated cardboard box.
They offer superior resistance to abrasion and tampering to that offered by self adhesive vinyl tapes. They are tolerant of temperature fluctuations, maintaining a strong bond even in refrigerated storage conditions. Reinforced with fibreglass, this gummed tape is extremely strong and impossible to remove without traces of damage. Made from Kraft paper. Available in a range of widths and lengths. Adhesive activated by water using the relevant Water Activated Tape Dispenser

Our comprehensive range of cushioning and void-fill materials covers everything from corrugated rolls and bubble wrap to foam and loose fill chips. Also including options made from a minimum of 30% recycled content. Whatever the need, we have the right solution to fill voids and cushion products that can be vulnerable to damage during delivery. So it's important to have the most effective 'in the box' padding to keep items in perfect condition. Our experts are here to help find the ideal solution.

SEALED AIR AIRCAP® BUBBLE WRAP ROLLS
LDPE

AirCap® and AirCap®E bubble film rolls are made using barrier film to help air retention, which keeps the film inflated longer than some other films. The AirCap®E bubble 200 metre roll configuration gives a roll diameter that is similar to some other standard 100 metre rolls, which improves handling efficiencies and reduces costs and is more friendly on the environment as well as saving valuable space. A range of bubble sizes allows for picking the exact type of bubble roll best suited for the product being shipped or the level of protection required.

* Due to the 30% recycled content there may be colour variations from batch to batch.

JIFFY BUBBLE FILM ROLLS

LDPE

The range of small and large bubble films offer an economical, effective solution for void filling, interleaving, wrapping and cushioning. Jiffy bubble film uses a layer of barrier film that seals each air pocket, reducing air escape, giving longer lasting protection and performance. Suitable for both heavy and lightweight items on longer storage or journey cycles.

JIFFY ASTRO®
PACKAGING FOAM ROLLS

LDPE

Jiffy Astro Foam® is a low-density polyethylene layer that is a gentle alternative to some more traditional packaging wraps, so is ideal for protecting items that need special care and attention, offering protection from scuffing and abrasion. Available in roll form, sheets and bags and in a variety of thicknesses, making it extremely versatile and suitable for a multitude of applications from delicate china to concrete blocks, furniture and consumer electronics and any items requiring gentle cushioning or interleaving protection.

INTRODUCING
A PARTNER

Jiffy®

+

Since 1964, when we manufactured our first Jiffy® Padded Bag®, we have continued to innovate.

In our Cheshire business unit, in the North West of the UK, we extrude high performing bubble films and laminates, and produce a vast range of postal and packaging solutions including the Jiffy® AirKraft®, MailMiser® and
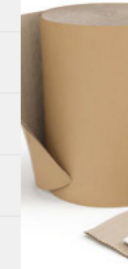

Superlite® protective mailing bags. We extrude technical foams and polyethylene materials for a wide range of applications and markets. Jiffy® is a market leader and a household name in the UK, and was recently awarded 'British Superbrand' status. We continueto innovate and bring new products to market as well as educating our customerson the correct use of our iconic products.

We are forever developing our focus on environmentally conscious products.

We offer recycled bubble film, all paper mailing options, and are continuing to bring new products to market that meet the ever-growing demands of the customer base.

MASTER'IN LOOSE FILL CHIPS

The Master'in range of loose fill chips offer environmentally friendly options for filling packing voids and offering added product protection. Loose fill chips are designed to protect products by absorbing shock and vibration that can be encountered during packing and transit. Choose from the 100% recycled product that is made from post consumer and industrial waste, which can also be reused or recycled, or from the bio chips that are designed to be compostable in domestic or bio waste.

| ITEM CODE	TYPE	BAG SIZE (FT³)	UNIT	RECYCLED CONTENT

612411	100% Recycled	15 Cubic FT	Pack	100%

SINGLE FACE CORRUGATED PAPER ROLLS

Corrugated paper rolls are made from 100% recycled paper, with smooth paper on one side and corrugated fluting on the other. The raised fluting offers cushioning and padding, while the smooth paper helps to reduce scratches on delicate surfaces. Being made from paper, the product is lightweight, which makes it ideal for wrapping, packing and void filling.

ITEM CODE	WIDTH (MM)	LENGTH (M)	UNIT

FOAM PROFILES

A range of foam profiles that are manufactured from polyethylene foam, free from CFC's, that provide extra protection for edges and corners, which are more prone to damage during transit. The range offers different shapes and profile sizes, that allow for the best shape for the product being packed.Our Green foam profiles are made from 100% recycled content making them exempt from the Plastic Packaging Tax. All of the products are flexible, easy to manipulate and easy to cut, so improve efficiency and speed in packing.

CUSHIONING AND VOID FILL

FILLPAK MANUAL

The FillPak Manual converter is designed to eliminate labour-intensive 'crumpling' of paper by hand. The converter takes a single layer of paper and forms it effectively to provide effective product protection during delivery. It's simple compact design, and no need for electricity, means it can be placed in any packing environment.

ITEM CODE	DESCRIPTION	SIZE (MM)	LENGTH (M)	QUALITY

INTRODUCING
A PARTNER

Ranpak®

Personalised packaging solutions for every product.

Ranpak's paper-based packaging systems offer eco-friendly, cost effective solutions. Tailored to your needs, we ensure that your packing operation works smoothly and your products arrive safely at their destination.

MACHINERY AND AUTOMATION

Machinery solutions are delivered by machinery specialists who are experienced in selling packaging equipment and creating solutions to solve some of the most complex packaging challenges.

+ Air Cushioning and Void Fill

+ Paper Cushioning and Void Fill

+ Pallet Wrappers

+ Case Handling

+ Strapping

+ Automated Boxing Systems

+ Automated Bagging Systems

+ Conveyors and Machine Accessories

INVEST IN MACHINERY AND BENEFIT FROM:

+ Cost savings
+ Improved operational efficiency
+ Overcome labour shortages
+ Faster packing times
+ Enhanced presentation of the finished product
+ Minimise damage and loss
+ Optimise material usage
+ Reduce waste

Whether you're looking to bring in machinery for the first time, or build on a current system, we provide solutions to fit every part of your packaging operation.

UK-WIDE TECHNICAL SERVICES AND ENGINEERING SUPPORT

We work with our partners to provide an unrivalled customer experience to all of our clients covering consultation and advice, machinery and automation design, installation and maintenance.

Training is also available to support you to get the most from your machine as well as industry leading warranties, spare parts and flexible payment options.

Contact us to find out more.

We have a wide range of postal packaging products to suit all mailroom requirements, created to keep items well protected during delivery. Choose from envelopes, mailers, boxes and postal tubes from market leading brands such as Jiffy, Sealed Air, and our own-brand Master'in.

WANT TO MAKE YOUR PACKAGES STAND OUT?

Contact us to discuss printing your logo or message on selected envelopes, mailers and postal wraps*.

* MOQ's and additional set up costs may apply.

POSTAL
SIZES AND WEIGHTS

Our range of postal bags from world-famous brands like Jiffy and Sealed Air remain unrivalled in terms of strength and performance. We also provide polythene postal packaging bags, rigid envelopes and versatile postal tubes to meet the needs of our customers. To help you choose the best product in which to protect and send your item, please refer to the guide below for Royal Mail's size and weights formats.

Max. thickness/depth	5mm	2.5cm	16cm	46cm	3m length and depth combined	

JIFFY PAPER PADDED MAILERS

High quality durable Kraft lined padded envelope filled with cushioning paper fibres providing outstanding protection. These mailers are extremely tough, puncture resistant padded envelopes which are ideal for posting more robust and heavy duty products. Jiffy gold self-seal padded envelopes are grease and puncture resistant and are ideal when maximum protection is required as the fibres expand with continued use, providing extra cushioning. Manufactured from strong 90 gsm Kraft paper with 100% recycled paper fibre lining. Four fold construction with double fold corners and double glued bottom flap and side seam for extra protection and strength. The self adhesive strip (except on reference SPB8) forms a firm seal so there's no need for glue or tape.

## JIFFY AIRKRAFT BUBBLE LINED PAPER MAILERS
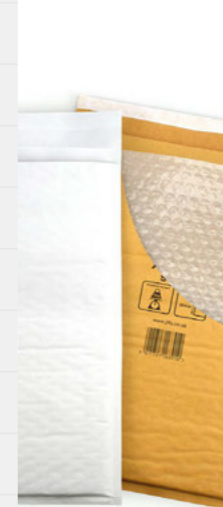

These Jiffy bags have a bubble lining which is laminated to the paper outer to give extra strength and puncture resistance, protecting against shocks and withstanding the knocks that happen during transit through the post. The outer is manufactured from lightweight 70 gsm paper and the long lasting bubble is made from 32 micron bubble with barrier air retention technology. The sides are welded to prevent bursting and give you peace of mind that your product will arrive in great condition by using a Jiffy Airkraft gold bag. With a wide range of Jiffy bags in stock you can be sure to find the postal bag to fit your product. Jiffy Airkraft bags are also available in white for a more premium finish.

SEALED AIR MAIL TUFF POLYTHENE MAILERS
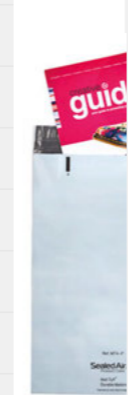

Our best selling 45 micron polythene Mail Tuff envelopes assure confidentiality and security. Goods are protected with a tamper evident closure system which prevents unauthorised opening, whilst the plastic construction ensures puncture resistance and protects contents from water and the elements. The Easy tear strip allows the recipient to open the package easily without damaging the contents and the high quality matt finish of the write on surface is ideal for handwriting, franking, label adhesion or ink jet printing. Mail Tuff envelopes are supplied in a unique and handy dispensing carton for convenient use and storage.

RECYCLED POLY MAILERS

Made from 100% Recycled Content, Strong and lightweight, polythene mailers are the perfect choice for keeping costs down but also for ensuring products are kept secure and safe during postage. All of our mailers are opaque to keep contents hidden and safe, ensuring confidentiality at all times. Self-seal strips make for easy closure allowing you the flexibility of resizing your mailer to hold the product secure along with providing tamper evidence. The construction of the plastic envelopes makes sure contents are protected from water.

CIRCULAR POSTAL TUBES
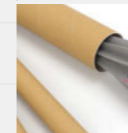

The traditional postal tube, used to send documents and posters securely through the postal service network. Circular postal tubes are designed so that the paper contents can be rolled up, which stops creases and fold marks. Each postal tube comes supplied with white plastic end caps. Made from strong board, these tubes are reusable and offer supreme product protection.

TRIANGULAR POSTAL TUBES

These triangular postal tubes are provided flat-packed and in packs, which makes storage more efficient. The triangular shape once constructed offers additional security during transit as they will not roll around, which offers extra protection through the postal network. The more stable storage makes them easier to go through automated reading systems, which allows for quicker label scanning. Made from rigid corrugated board they offer the same protection as the more traditional round tube. Each tube is secured using a self-seal strip which not only allows for quick assembly but also provides extra product security.

SILICA GEL PACKETS

Silica gel is an essential product for manufacturers and distributors of all moisture sensitive products during transit and in storage. Silica gel removes humidity in sealed packages, prevents corrosion, condensation, rusting and fungal growth and is recommended for precision equipment, leathergoods and pharmaceuticals, to name but a few. Available in a range of sachet sizes. (Recommended volume for airtight package of 5g per cubic foot).

Our polythene bags offer a cost effective way to protect goods from dirt and moisture during delivery and storage. They're ideal for general, ecommerce and industrial use and are available with and without a grip seal. Also with options that are made from post-consumer recycled content and are recyclable.

BAG TYPES

Our bags come in two types:

+ **Polythene**

Polythene bags are a cost effective solution to protect items from dirt, moisture and grease.

+ **Grip seal**

Grip seals keep bags closed and secure so the contents remain safe.

POLYTHENE BAGS

Polythene bags are one of the most cost effective ways to protect goods. Available in multiple film thicknesses, to allow for multiple product types, the range of clear polythene bags provides an easy way to protect goods from dirt and moisture but also allows you to see the goods inside.

GRIP SEAL BAGS

Grip seal polythene bags are more secure versions of standard polythene storage bags. The seal offers a secure way to keep the bags closed and contents safe, which makes them perfect for items that are going to be stored for longer periods. The seal is also easy to open, so grip seal bags are perfect for reuse.

Items made from recycled content are subject to availability and changes. Please contact us for the latest information.

We offer a range of hand and machine stretch films designed to hold goods securely on a pallet during transit. Available in blown and cast film, the ever evolving range offers increased efficiency and cost savings. There are many film options available, our experts are here to help you and your customers choose the best solution to maximise performance and maintain load stability. We're also expanding our range of environmentally-friendly films to include those made from a minimum of 30% recycled content.

STRETCH
WRAP

Whenever selecting film, the following variables should be taken into account:

+ **Type of product**

Stretchfilm type is dependent on what you are wrapping. Lighter, more fragile goods require a lower gauge of film to avoid being crushed than heavier, more solid goods that can withstand the pressure of higher gauges.

+ **Type of load**

There are two factors that determine load type – the weight of the load and the uniformity of its outside surface. Examples of different load types are shown to the right.

+ **Type of equipment**

Machine stretch levels will help determine what type of film is necessary to wrap a load. Higher gauges were once required for machines with high pre-stretch levels, whereas today we are selling thinner, tougher films which are able to endure greater levels of stretch whilst maintaining their strength.
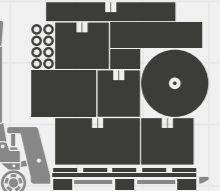

LOAD
TYPES
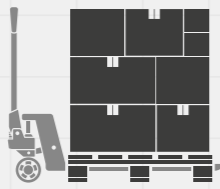

A loads
have no irregularities.
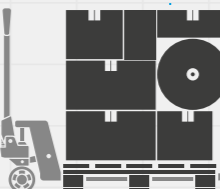

B loads
have protrusions up to 100mm

C loads
have protrusions over 100mm

USEFUL
INFORMATION

There are two types of packaging film which are determined by their manufacturing process. Both films offer great benefits, but the choice of which to use should be based on your goals, circumstances and expectations. Generally, both films offer money saving pre-stretch performance and effective load containment. They're also suitable for a wide range of applications.

+ **Cast Film**
Cast film is made when sheets of heated resin are fed through a rolling path using chilled rollers that cool and solidify the film. Compared to blown film, cast is clearer which offers better clarity of the product and labels underneath. It also unwinds quieter and is soft and easy to stretch, but strong enough to resist tearing.

+ **Blown Film**
Blown film is made when heated resin is blown in to a bubble which is transferred in to rollers and cooled by the surrounding air. Compared to cast film, blown is tough, resilient and very resistant to puncture. It also has an exceptional cling, but makes more noise unwinding.

MASTER'IN CAST HAND STRETCHFILM

Cast hand stretch films offer very good film clarity, allowing for product visibility during transit. Cast films are also very quiet when being unwound from a roll, which means they're ideal for areas with high volume packing activity. Cast films are also more elastic, so can offer better stretch abilities. Extended core hand wrap allows users to apply film quicker and easier.

ITEM CODE	THICKNESS (MU)	WIDTH (MM)	LENGTH (M)	CORE TYPE	BOX QTY
612339	15	100	150	Standard	45
612435	14	400	300	Standard	6
612436	16	400	300	Standard	6
612432	16	500	300	Standard	5

612376	19	400	300	Extended	6
612377	22	400	300	Extended	6

CAST HAND PRE-STRETCHFILM

Using pre-stretch cast films makes it possible for users to achieve the same levels of wrapping, load stability and product protection whilst using less film by weight, thus reducing the amount of packaging film required. All of the other properties of a pre-stretch film are the same as standard cast hand film.

ITEM CODE	THICKNESS (MU)	WIDTH (MM)	LENGTH (M)	CORE TYPE	BOX QTY
612337	7	400	600	Extended	6

MASTER'IN BLOWN HAND STRETCHFILM

Blown hand stretch films offer excellent puncture resistance, which makes them great for wrapping odd shape pallets or products. Blown films also offer superior tack over cast films, which makes them stick to pallets and goods easier, which speeds up the wrapping process. Blown films are not as elastic as cast films, so it is easier to apply larger force on packed pallets, which makes the film perfect for use on heavier pallets and goods.

POLYTHENE PALLET TOP SHEETS (CENTER FOLD)

Polythene top sheets help to protect goods that have been loaded onto a pallet, ready for shipping. Quick and easy to use, simply put on top of packed goods and then secure in place by wrapping and then strapping the pallet. The combined packaging will help to protect the goods from moisture, dirt and dust.

INTRODUCING A PARTNER

Pregis

Pregis provides customised packaging solutions including a wide range of sustainable and innovative packaging systems, designed to improve your supply chain and packing stations.

Whether you already have a process in place or are starting your fulfilment design, Pregis systems can be tailored to fit your current and future operations. As a simple bolt-on solution or a completely customised system. Dedicated project engineers, project planners and technicians create the solutions you need to...
- *Reduce the total cost of ownership*
- *Maximize productivity*
- *Increase the output per hour*
- *Improve ergonomics*
- *Reduce touch points*
- *And more...*

While optimising your packing process, Pregis aims to Protect, Preserve and Inspire.

ARE YOU RETURNS READY

With returns on the rise, it's important to make sure your packaging allows customers to safely and easily return your goods.

We have a range of packaging products and bespoke solutions to make sure your packaging is returns ready and products come back to you in perfect condition.

Contact us to find out more

Our range of strapping and pallet protection materials include hand and machine strapping bands and edge protectors. Available in polypropylene and polyester material our strapping bands come in a selection of colours and offer an alternative to stretchfilm for securing boxes during transit. Combined with the edge protectors to strengthen loads and prevent damage.

POLYESTER STRAPPING BANDS

NEW PRODUCT
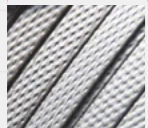

Polyester strapping is used as anti-theft protection and also to help secure goods on pallets to keep them stable for transit, thereby helping to reduce movement and damage. Polyester strapping (PET) is perfect for heavy-weight goods. It offers better mechanical properties than steel bands and less damage to the pack and pallet, and therefore a greater transportation performance.

POLYPROPYLENE STRAPPING

NEW PRODUCT

Plastic strapping is used as anti-theft protection and also to help secure goods on pallets to keep them stable for transit, thereby helping to reduce movement and damage. Polypropylene strapping is perfect for light to medium weight goods – and due to its elastic properties, it offers resistance against scrapes and knocks.

CARDBOARD EDGE PROTECTORS

Cardboard edge protectors are used when stacking pallets to help to strengthen loads and make them more stable for shipping. Cardboard edge protectors can also be cut down to be used inside boxes to improve strength or put onto pallets to help prevent box damages through strapping or stretch film securing.

PACKAGING PAPER AND BOARDS

Our packaging papers include a wide range of products from Pure and Imitation Kraft to Waxed Kraft Paper and Tissue Paper.

Packaging papers are ideal for wrapping, separating and covering products to protect them from dirt, moisture and damage during transit and storage. They offer a cost effective solution for a whole range of products including glassware, bottles, textiles, pipes, automotive parts, and more. Whether you or your customers are looking for a form of wrapping, surface protection, outer packaging, interleaving, interlaying or lining, there's a packaging paper to suit.

PURE KRAFT PAPER

Pure Kraft paper is a superior strength brown paper, made using well bonded fibres to ensure the paper is robust. Because Pure Kraft paper is made using unbleached pulp, the paper has higher strength and durability which offers superior puncture and tear resistance. These Pure Kraft paper sheets are fully recyclable and biodegradable. The roll format allows for easy dispensing if used in conjunction with a counter top roll holder.

ITEM CODE	GRAMMAGE	WIDTH (MM)	LENGTH (M)

WAXED KRAFT PAPER

Pure Kraft paper is a superior strength brown paper, made using well bonded fibres to ensure the paper is robust. Because Pure Kraft paper is made using unbleached pulp, the paper has higher strength and durability which offers superior puncture and tear resistance. The addition of a waxed finish provides a paper that can offer a moisture resistant barrier, which makes this paper ideal for use with wrapping oily or greasy items. This moisture protection also acts as a corrosion inhibitor, which makes this perfect for use in shipping of metallic components and machine parts.

ITEM CODE	GRAMMAGE	WIDTH (MM)	LENGTH (M)
618602	65 gsm	900	100
612370	90 gsm	900	225

WHAT ARE KRAFT PAPERS?

Kraft papers relate to a range of papers that are manufactured using an extra chemical treating process on the ground paper pulp, which increases the overall strength of the paper. Versatile, strong and hard wearing, kraft paper is ideal for wrapping and protecting goods.

- *Pure kraft* made from pure virgin fibres is the strongest paper and offers greater tear resistance
- *Imitation kraft* made from 100% recycled material offers good protection and is more cost effective than pure kraft
- *Waxed kraft* provides additional moisture and corrosion protection by the addition of an extra wax layer on pure kraft paper

PURE KRAFT PAPER SHEETS

Pure Kraft paper is a superior strength brown paper, made using well bonded fibres to ensure the paper is robust. Because Pure Kraft paper is made using unbleached pulp, the paper has higher strength and durability and offers superior puncture and tear resistance. These Pure Kraft paper sheets are fully recyclable and biodegradable.

ACID FREE TISSUE PAPER

Made using a process to remove all acidic pulp, acid free tissue paper is an ideal wrapping product for delicate and fragile goods going into storage. Acid free tissue paper is also an ideal protective product for precious metals, like jewellery or silverware. Tissue paper is lightweight, soft, flexible and economical, so is also an ideal product to use for interleaving or as void fill in larger packages.

ITEM CODE	GRAMMAGE	DIMENSIONS (MM)	PACK QTY

SMART PACKAGING DESIGN

We understand that some packaging challenges can't be solved with an off-the-shelf solution. This is why we work with trusted partners to design solutions that perfectly fit each customer's needs. Whether you are looking for a tailor-made pack design, a customised packaging item or a new packaging system, you can put your trust in us to find the right solution for you and your customers.

Our partners have already created thousands of bespoke packaging solutions and are happy to advise you on the most appropriate pack designs and materials to protect your products and improve your process.

Bespoke options may also be required by your customers for one of many reasons and our partnership provides you with an opportunity to offer a service and solution specific to them.

HOW DOES IT WORK?

Packaging consultation to understand your requirements → Generate innovative packaging ideas and designs → Create the new packaging solution → Sample production and testing → Production and delivery of the final packaging

WHY OPT FOR A BESPOKE PACKAGING SOLUTION?

+ Cost reductions and efficiency
+ Improve logistical performance
+ Make your packaging more sustainable
+ Better warehouse optimisation
+ Enhance the customers experience with the brand
+ Reduce damages
+ Improve returns process
+ And much more

Contact us to get advice, discuss your bespoke packaging needs or arrange a consultation.

USEFUL INFORMATION

Before packing any object, ask yourself the following questions:

How big is it?
The size of the object will influence the amount of protection it requires; small lightweight items will have different needs to large cumbersome items. Carefully consider the size and any problems this might cause

What shape is it?
Is there anything that may require extra support or cushioning?

What does it weigh?
A very important consideration. A computer for example would require more cushioning than a calculator would.

How fragile is it?
Is the product likely to break if dropped or subjected to aerial sorting?

How is the product to be shipped?
Is there more than one item to be packaged? If there is more than one how fragile are they collectively?

Is there a special surface finish?
Highly polished surfaces are prone to scratching and require protection.
